

December 1, 2016

Dear Friend,

At the end of last year we asked you to help the Friends of Fitchburg Library purchase a 3-D printer for our library. Thanks to your generous donations we were able to purchase not only one printer, but two complete with associated software, laptops, and materials! Be sure to watch the library's calendar and newsletter for upcoming classes in this state-of-the-art and fascinating new technology.

In other exciting news we're happy to report that as a result of our extra fund-raising efforts for outreach in 2015 we'll be able to help the library purchase an outreach vehicle. The library's new Outreach Librarian will use the vehicle to take library materials and services into the community to people who are otherwise unable to get to the library.

Now, Friends would like to "outfit" the vehicle; **will you help us?** Funds raised from this year's Annual Giving Campaign will provide equipment, books, materials and new technology such as mobile WiFi Hotspots-equipment that enables internet connection where WiFi isn't available..

This year we're reaching out to generous donors like you to ask for your continuing financial support. Thank you for your commitment to the library. We couldn't do what we do without you!

Sincerely,

Mary Power
President, Friends of Fitchburg Library

Sincerely,

Wendy Rawson
Library Director
